

# Highway-DOT / Mechanical

## ROW Trimmer

- Cuts up to 30' high
- Cost effective in dealing with overhanging limbs and branches
- Smooth cuts — not jagged
- Can be used any time of the year

# Highway-DOT / Mechanical

## Skid-Steer Grapple

- Used to move logs and brush and “wind-row” debris
- Reduces manpower needs
- Safer and more efficient than manual crew

# Highway–DOT / Mechanical

## Magnum Mulcher

- Great for clearing roadside areas
- Mulches trees up to 18-inches in diameter
- Doesn't throw material, making for safer operation

# Highway-DOT / Mechanical

## Tracked Brushcutter

- Rubber-tracked medium-sized machine
- 6-foot working height
- Capable of cutting trees and brush up to 4"-5" in diameter

# Highway-DOT / Mechanical

## Slashbuster

- Great for clearing brush and trees
- Mulches trees up to 18-inches in diameter
- Doesn't throw material, making for safer operation

# Highway-DOT / Mechanical

## Jarraff

- 75' cutting height
- Great for overhanging tree limbs
- Great for “day lighting” roads
- Safe, clean and efficient cutting

# Highway–DOT / Mechanical

## Aerial Lift and Chipper

- Very versatile
- 55-foot working height
- Chipper is capable of grinding up to 18-inch diameter material
- Solves sight-line problems

# Highway-DOT / Spray

## ATVs with Ultra Low Volume Spray Systems

- All-terrain-vehicles (ATVs) are well suited for ultra low volume applications, boosting productivity and effectiveness while maintaining a low profile
- Sprayer and tank configurations can be made to suit the type of application or terrain
- Gets into tight areas

# Highway–DOT / Spray

## Spray Truck

- Available nationwide
- Capacities up to 3,000 gallons
- Can be equipped with “weed seeker” technology
